40th ANNUAL FAIR

LACOMBE, ALBERTA

WEDNESDAY, JULY 31st, 1935

Entry Fee 10 p.c. of First Prize Except Where Specified

RULES AND REGULATIONS

Rules and Regulations as set out in prize book for the year 1931 apply for this Fair. Entries will require to be in the hands of the Secretary not later than 5 p.m. July 29th.

HORSE DIVISION

DIRECTORS IN CHARGE: J. M. Douglas, Fred Stewart, F. Langrock, P. G. Morrison and F. H. Reed.

REGISTERED HORSES: The following classifications and scale of prizes apply to Clydesdales, Percherons and Belgians.

	1st	2nd	3rd
1 Stallion 1 year and over	6.00	4.00	2.00
2 Brood Mare in foal or foal at side	6.00	4.00	2.00
3 Foal 1935	6.00	4.00	2.00
4 Dry Mare 3 years and over	6.00	4.00	2.00
5 Filly 1 year and under 3 years	6.00	4.00	2.00

Champion Stallion. Champion Mare.

GRADE HORSES: Heavy Draught 1500 lbs. or over.

1 Dry Mare or Gelding 3 years and over	6.00	4.00	2.00
2 Foal 1935	6.00	4.00	2.00
3 Brood Mare in foal or foal at side	6.00	4.00	2.00
4 Filly or Gelding under 3 years	6.00	4.00	2.00
5 Team Purebred or Grade harnessed to wagon	10.00	6.00	4.00

AGRICULTURAL PURPOSE, over 1300 lbs. and under 1500 lbs.

1 Dry Mare or Gelding 3 years and over	6.00	4.00	2.00
2 Foal 1935	6.00	4.00	2.00
3 Brood Mare in foal or foal at side	6.00	4.00	2.00
4 Filly or Gelding under 3 years	6.00	4.00	2.00
5 Team harnessed to wagon	10.00	6.00	4.00

FOR BOYS AND GIRLS 11 to 20 YEARS OF AGE. NO ENTRER FEE.

F. H. REED SPECIAL

Best 1935 Colt shown on halter. 5.00. 4.00. 3.00. 2.00. 1.00.

50 cents will be paid each entrant after 5th prize is awarded.

SADDLE PONIES, Not to exceed 14.2 hands.

1 Saddle Pony ridden by boy under 15 years	3.00	2.00	1.00
2 Saddle Pony ridden by girl under 15 years	3.00	2.00	1.00

SPECIAL PRIZE: Boys and Girls 11 to 20 years of age.

BLAKLEY'S SPECIAL

Best Colt from Belgian Stallion Huxley Max. 5.00. 3.00. 2.00.

Best Colt from Percheron Stallion, Jack No. 13338.

L. Brown Special. 5.00. 3.00. 2.00.

CATTLE DIVISION

DIRECTORS IN CHARGE: J. Roper, J. Biglands, H. Elwell, J. Laing, J. Graydon.

REGISTERED CATTLE: The following classifications and scale of Prizes apply to Registered Shorthorns, Aberdeen Angus, Herefords, Holsteins and Ayrshires.

1 Bull 1 year and over	6.00	4.00	2.00
2 Bull under 1 year	6.00	4.00	2.00
3 Cow 3 years and over milking or in calf	6.00	4.00	2.00
4 Heifer 1 year and under 3 years	6.00	4.00	2.00
5 Heifer under 1 year	6.00	4.00	2.00

Champion Bull. Champion Female.

GRADE BEEF BOYS & GIRLS 11 to 20 YEARS OF AGE. No entry fee.

1 Steer or Heifer under 1000 lbs. 5.00. 4.00. 3.00. 2.00. 1.00.

50c. will be paid each entrant after 5th prize is awarded.

GRADE DAIRY: Boys and Girls 11 to 20 years of age. No entry fee.

BANK OF MONTREAL SPECIAL

1 Heifer under 2 years	5.00	4.00	3.00	2.00	1.00
------------------------	------	------	------	------	------

50 cents will be paid each entrant after 5th prize is awarded.

SWINE DIVISION

DIRECTORS IN CHARGE: H. B. Wilson, Stan Puffer, A. Kries.

The following classification and scale of prizes apply to Yorkshire and Tamworth.

1 Boar one year and over	3.00	2.00	1.00
2 Boar under year and over 6 months	3.00	2.00	1.00
3 Sow 1 year and over	3.00	2.00	1.00
4 Sow under 1 year and over 6 months	3.00	2.00	1.00
5 Sow under 6 months	3.00	2.00	1.00

Champion Boar. Champion Sow.

GRADE BACON: Boys and Girls 11 to 20 years of age. No entry fee.

BLINDMAN VALLEY CO-OPERATIVE SHIPPING ASSN.

SPECIAL

1 Best pair Bacon Hogs under 220 lbs. 5.00. 4.00. 3.00. 2.00. 1.00.

50c. cents will be paid each entrant after 5th prize is awarded.

SHEEP DIVISION

DIRECTORS IN CHARGE: B. C. Milne, Stanley Sharp, D. Boden, H. F. Flewelling, Jas. Darroch.

The following classifications and scales of prizes apply to Registered Hampshire, Oxford and Suffolk.

1 Ram 1 year and over	3.00	2.00	1.00
2 Ram Lamb	3.00	2.00	1.00
3 Ewe 1 year and over	3.00	2.00	1.00
4 Ewe Lamb	3.00	2.00	1.00

Champion Ram. Champion Ewe.

GRADE SHEEP: Boys and Girls 11 to 20 years of age. No entry fee.

ROYAL BANK OF CANADA

SPECIAL

1 Best Market Lamb under 90 lbs. 5.00. 4.00. 3.00. 2.00. 1.00.

50 cents will be paid each entrant after 5th prize is awarded.

We are grateful to Mr. F. H. Reed, The Bank of Montreal, The Royal Bank of Canada, The Blindman Valley Co-op. Shipping Association. Mr. Brown and Mr. Blakely, whose contributions have made it possible for us to extend an opportunity to our Boys and Girls to come out and compete in these special prizes.

We are not getting out a prize list in book form this year, thereby conserving our money so as to offer better prizes in each division. The above will be the list from which you make your entries.

T. WILKES, President. D. F. CHISHOLM, Secretary-Treasurer.

CHILDREN'S SPORTS PROGRAM--RACES

	1st	2nd	3rd
1 mile Open	2.00	2.00	1.00
440 yards, c.p.m.	2.00	1.00	.50
100 yards, open	1.00	.75	.50
Relay Race	3.00	2.00	1.00

ovovity Race. 1.00. .75. .50.

Girls 8 years and under. .25. .15. .10.

Boys 8 years and under. .25. .15. .10.

Girls 8 to 10 years. .25. .15. .10.

Boys 8 to 10 years. .25. .15. .10.

Girls 10 to 12 years. .35. .25. .15.

Boys 10 to 12 years. .35. .25. .15.

Girls 12 to 14 years. .50. .35. .20.

Boys 12 to 14 years. .50. .35. .20.

NOTE: Races will start at 1 p.m. Sharp. Open races 15 years and over.

CALGARY GOLFER WINS AT LACOMBE

Lacombe, July 19.—Charlie Grant of Calgary, was the winner of the championship at the Lacombe Golf club tournament Thursday when he defeated Charlie Willis of Stettler, in a ding-dong final. Ideal weather prevailed and the golf was of high quality. Visitors voted the tourney most successful and the management was highly complimented on the efficiency of the arrangements. Results of Thursday's play:

Championship Flight

First Flight

Second round—Martin beat Jackson, Berke beat Denmore, Husband beat Fawcett, Garrett beat L. A. Walsh.

Semi-finals—Berke beat Martin, Garrett beat Husband.

Finals—Herbie Berke, Calgary, won from Julian Garrett, Edmonton.

First flight consolation, first round—Shields beat Roy Williams, West beat Harvie, Nugent beat Schultz, Wilson beat Odel.

Semi-finals—Shields beat West, Wilson beat Nugent.

Finals—W. J. Shields, Wetaskiwin, won from Stan Wilson, Lacombe.

Second Flight

Second round—Northwood beat Boycott, Nash beat Father Hastings, Lee beat Welliver, Hooper beat Morris.

Semi-finals—Nash beat Northwood, Lee beat Hooper.

Finals—F. G. Nash, Edmonton, won from Ron Lee, Stettler.

Third flight consolation, first round—Dr. Henry beat Winter, Burrows beat Wells, Dyke beat Bond, D. Decker beat Dyke.

Finals—Dr. Geo. E. Decker, Lacombe, won from E. W. Burrows, Stettler.

Fourth Flight

Semi-finals—Lilly beat Duncan, Nelles beat Chisholm.

Finals—A. R. Lilly, Edmonton, won from A. R. Lilly, Edmonton.

Fourth flight consolation, semi-finals—Galbraith beat F. W. Thorp, P. Thorp beat Moyness.

Finals—F. W. Galbraith, Red Deer, won from Percy Thorp, Bentley.

Special prize for hidden score was

a five-way tie and in the nine-hole playoff Buster Nelles of Lacombe, triumphed.

Special prize for the visitor from the farthest away point went to C. H. Duncan of Rosestown, Sask.

FOLLOWING UP THE "LEVY"

Speaking at Athabasca, Mr. Aberhart explained in a sentence where he proposes to get the money to retire the Social Credit dividend certificates he would issue to all adult residents of the province as Government-supplied meat tickets. "The Government will declare the dividends and recover them from the price spread."

These dividends would amount roughly to \$10,000,000 a month, at the proposed rate of \$25 to each individual. Since the average gross income of the people of the province is some \$15,000,000 per month, two-thirds of this would have to be handed over to retire the dividend certificates; leaving the householder one-third of his present income, in addition to the dividends received by him and his dependents. Or, which he would have to pay for all the goods bought for resale, all the cost of operating his farm or business, and the cost of living for his family.

This money is not to be collected through and income "tax"; which would be understandable, and would be also the simplest and fairest way to go about it. The money is to be got by a "levy" interposed between the cost and the selling price of goods. That is to say, between what one pays for an article, or pays to produce the article, and the price at which he sells it.

Obviously the present price spread does not amount to any such sum as \$10,000,000 a month. The spread is in fact so small as to be negligible business moving at the present minimum volume and sluggish pace. In many cases there is no spread at all between the outgo and the income of a concern a businessman or a farmer.

In quite a number of cases the "spread" is the wrong way, and farming or other operations are being carried on at dead loss, by the using up of capital or the incurring of debt.

Hence before the new levy could be collected from the price spread it would be necessary to be widened to produce the necessary amount. The \$10,000,000 would have to be added to present selling prices before it could be extracted from them. In other words, the prices of goods which would be marked up, which is precisely what Mr. Aberhart proposes in his Manual.

Roughly, that would mean a two-thirds increase in the average cost of goods to the consumer bought over the counter, of farm implements, building materials, and every other commodity passing by sale from one person to another. From bread to motor cars, and from false teeth to radios, everything would have to go up, by a margin sufficient to produce the required two-thirds advance in the aggregate of selling prices.

And with no resultant benefit from the advance to those engaged in production or distribution. The whole of the advance would be absorbed by the Government to retire the credit certificates.

In point of fact, every one would be worse off, whether wage-earner or "on his own." Worse off by the cost of the very extensive organization that would have to be maintained to issue the certificates and collect the money to retire them.

Everyone, that is, except the fortunate individuals who got jobs in the dozens of credit houses that would have to be established and in the army of directors, supervisors and inspectors who would have to be employed inside and outside to keep everybody in step and the complicated machinery operating.

A doubling or trebling of the civil service list would be inevitable. Inevitable also the doubling or trebling of the cost of paying the salaries of the Government employees. Which cost, it is to be noted, would have to be paid as taxation over and above the "levy" made to pay off the credit certificates.

And that, so far as visible to ordinary business judgment, seems to be the net result of the ingenious scheme, supposing it ever got past the initial difficulties cited by Major Douglas and was really set in operation.

A BAD CAR ACCIDENT

Roy E. Jones of Rimney was seriously injured on Sunday, when a car in which he was a passenger skidded into a ditch at Gull Lake at about 8 o'clock. The car was passing another machine near Ebeling's Corner when the accident occurred. The driver evidently misjudged the distance to edge of the road and the car struck the ditch and turned over. Roy Jones was in the front seat of the car and was severely hurt. Several ribs were dislocated from his spine and he will be in hospital for some time. Mr. Frank Gourney of Rimney was driving the car and Billie Jones was another passenger. Neither of these was injured. The car was badly smashed.

VITAL TO USE ALL CHOICES

The Calgary Herald voices a fear that, with so many parties in the field, opponents of social credit will so split their vote as to weaken effective electoral opposition. The following paragraph, from a recent editorial, summarizes the views of that newspaper:

The Herald believes that in view of the critical situation in which the province finds itself, and the possible danger through the presence in the field of so many groups that a highly fantastic economic program might win serious support, there should have been a working agreement among the groups opposed to Aberhart social credit. However, the Liberal leader, with his mind, no doubt, on Liberal successes in other provinces, has refused to consider anything in the way of a coalition campaign, and the merry free-for-all is on. As the campaign will be conducted, it will not be possible for opponents of social credit, and they are in a great majority, to make their votes solidly effective against a common enemy. Their support will be split up among several parties, while social credit will vote as a solid unit.

It will be the fault of the voters if any party receiving only a minority vote is returned to office. The Herald must surely have forgotten that in all rural ridings in Alberta the single transferable vote system is used. Under this system, if properly applied, a candidate must receive majority of votes cast, even if it is necessary to scan ballots for second and third preferences.

It is quite possible for a candidate who, on first count, has received little more than a fifth of the total vote, to be elected finally. Similarly, a candidate who is second or third on the final count if all voters mark their ballots properly, showing their preferences.

Even if, as the Herald suggests, social credit supporters vote as a solid unit, that will not ensure the election of their candidate unless on the first count he is given a majority of the total vote; or, if he is not elected on the first count, he is able to secure enough second choices on opponents' ballots to give him a majority on the final count.

For example, suppose in some rural riding 1,000 votes are recorded, being divided between a Social Credit, U. F. A., a Conservative and a Liberal candidate. Suppose after first count the Social Credit man receives 350 votes, the U. F. A. 250, the Conservative 201 and the Liberal 199. The Social Credit nominee has not a majority, so the ballots cast for the low man are distributed according to the second count preferences marked on them. If 149 Liberals marked the figure "2" after the name of the Conservative candidate, and 50 voted "2" for the U. F. A. candidate, the result at the end of the second count would be Social Credit 350, Conservative 350 and U. F. A. 300. Now the 300 U. F. A. ballots would have to be distributed according to their second choices, and if all expressed such a choice, and a majority of the U. F. A. supporters expressed a preference for the Conservative, the Conservative would be declared elected, just as soon as his total had reached the 501 mark.

If opponents of Social Credit in all ridings outnumber its supporters they can defeat it in all ridings by marking their ballots 1, 2, 3, regardless of what party they are supporting. On the other hand, if the voters who are opposed to Social Credit "plump," that is, if they vote only "1" and do not mark their 2nd and 3rd choices, they are opening the way to the election of Social Credit by a minority vote.

This is one election where the registration of a minority opinion in all constituencies is most important. It would be deplorable if such an experiment as Social Credit should be authorized by a minority vote.

BUSINESS MOVES UPWARD

From the government's Bureau of Statistics figures have been issued for May business which take Canada back to the relatively high level of April, 1931. Business operations uncovered many surprises on the constructive side with the general situation being considerably brighter than for some months past. Common stock prices, due largely to the jump in oil and mining shares, reached a new recovery high in May. Bank deposits also soared upward to the highest point in recent years, while bond prices remained at their relatively high level. The breaking of the drought by heavy rains in the west caused a minor reaction in commodity prices.

The manufacturing index, made up of 29 factors, was 105.1 against 94.0 in April, and reached the highest point since May, 1930. Boot and shoe production went into a new high ground. Activity was generally maintained in the primary iron and steel industry. One of the brightest spots in May was external trade, with the adjusted import index up to 84.9 from 71.5 in April, while exports were higher at 84.1, compared with 81.5.

As far as construction is concerned, there is no industry in Canada with so many ramifications. It reaches to scores of equipment companies, it goes to the lumber yards and the camps, it reaches transportation and, above all, takes up casual labor, the teamster and the worker who could not hold a job on a factory machine if he had one. There are many new building jobs planned for this year. There is no doubt about the direct and indirect benefit to everybody from new building. If the big corporations led the way in new building it would engender a whole lot of confidence with the general public. Much of that confidence already is evident, since the government set the pace with its huge construction program. Others—not the big corporations—are taking it up. They are enthusiastic for the future of Canada. They're building.

GULL LAKE SPORTS

Softball games feature in the Sunday afternoon sports at Aspen Beach. The Government Park makes an ideal spot for these games and large crowds of people are on hand every Sunday to see the various teams in action.

Both the Gull Lake Boy's teams and the Girls' teams have beaten outside teams. Last week the Gull Lake Girls defeated Jackfish Girls by a score of 31 to 13. The Gull Lake boys also won their game from Sunnyside.

On Sunday last, Lacombe Boys' Soft Ball team administered two severe beatings to the Gull Lake boys. Bring your teams to Aspen Beach for your games. You are welcome to use the park.

FLOWERS NEGLECTED

Some of the flower boxes along our streets look fine, and are really ornamental. They show that those in charge have not been neglecting watering them. It takes a lot of water this hot weather. It is too bad that a prize was not offered for the nicest box this Fall.

WORLD HAPPENINGS
BRIEFLY TOLD

The tri-centenary of the death of Champlain was observed in Paris with exercises emphasizing Franco-Canadian friendship.

Princess Mary, daughter of the King and Queen, has left the hospital where she underwent an operation June 4.

A decree by Adolf Hitler whereby the ministry of war is given permission to enlist foreigners in the German army has been announced.

The Daily Mail said experts are working on behalf of Imperial Airways, with the support of the government to complete a detailed plan for north trans-Atlantic service.

The London Daily Express says Germany now possesses a fleet of war tanks, despite the fact they are specifically forbidden under the Treaty of Versailles.

Want to buy an island? Fanning Islands, Ltd., has two for sale—the Fanning and Washington Islands located 1,000 miles south of Honolulu—but they must remain British subjects.

The French government, facing a budget deficit of from seven to eight billion francs (approximately \$462,000,000 to \$528,000,000) for the current fiscal year, is expected to make drastic administrative economies.

U.S.S.R. press charged Japan's "deliberate provocations" along the Siberian border and Germany's preparations to attack European Russia placed the Soviet in grave peril of war.

It was learned that Hon. W. J. Roche, chairman of the civil service commission, has tendered his resignation to the government, and it has been accepted. He will, it is understood, receive a gratuity of \$7,500, one year's salary, on retirement.

Soldiers On Guard

American Government To Buy Many Millions In Gold

United States government gold valued at many million dollars will be buried in the middle of Fort Knox, Ky., where 1,300 soldiers are on duty.

Treasury draftsmen, it was disclosed, have been ordered to rush construction of a huge underground vault at the army post as part of the government's policy of removing monetary stocks from vulnerable coast cities.

Much gold now stored in New York and Philadelphia will be transferred to Fort Knox. Not long ago nearly \$3,000,000,000 were sent from San Francisco to Denver, Rocky Mountains and the Appalachians thus ward the precious bullion from any possible enemy invasion or mob.

The government's gold stocks total more than \$3,000,000,000.

Making Tour Of World

Dr. E. Cora Hind Will Write Special Articles During Trip

Dr. E. Cora Hind, distinguished newspaper woman who was recently honored by the University of Manitoba, sailed from Montreal on the Duchess of York for an 18 months tour of the world. Miss Hind, whose ability as a judge of standing crops and of livestock has made her a noted figure in the Canadian West and earned for her an unique place in journalism will visit the agricultural countries of Europe as well as the new lands where fresh furrows are being broken, writing on route special articles for the Winnipeg Free Press, with which journal she has been for many years.

The Canadian Nickel

Finance Minister Would Like To Change The Design

If there weren't so many slot machines in Canada, Finance Minister E. N. Rhodes would change the design and size of the Canadian nickel. Presided by Hon. W. D. Eider (Lib. North Waterloo) in the house to make the nickels smaller, Mr. Rhodes said they were in his opinion "one of the most hideous coins we have."

Because of the number of slot machines, telephones, for instance, he could not change the design and he hoped in the future it could be done, making the coins "more in keeping with artistic tastes."

New Powerful Ray

New newspapers reported a new radio-active micro-wave had been discovered in Germany. Scientists declared the new ray was more powerful than the Hertzian rays and would be of great value in signalling the approach of ships. A ship coming into contact with the ray-beam would immediately signal its location through a loudspeaker installed on the vessel sending out the waves, it was said.

Pessimistic commentator says farming has been tough ever since the auto replaced the horse. It still looks back to its hay day.

Within a 50-mile radius of Spokane, Wash., are more than 90 fresh water lakes.

Loggers Trying Out
Caterpillar Tractors

British Columbia Testing Latest Device For Harvesting Timber

Into the woods of British Columbia has lately come a strange new species, a race of monstrous mechanical cats—iron cats with seven steel tails, cats with the power of 80 horses, cats that can handle half a dozen huge logs as easily as you would lift a match.

They are the wildcats of modern logging, the caterpillar tractors that make old loggers rub their eyes and legislators deliver speeches on forest conservation. Here is the latest of a long list of devices invented by man to harvest the heaviest crop on earth, and it is born out of nearly a century of experience with the great timber of this coast.

First came the big ox teams, a dozen animals or more, dragging out logs over greased skidroads, small sleds and cranes, developing the art of proximity to its highest recorded point among the old-time logging bosses of British Columbia.

Then the little donkey engine, ground-yarding slowly, painfully, tearing up the soil like a battle-field as the logs nosed into it on their way to the skidway.

Then the skidder, with its "sky line" and "bicycle" pulling logs in like clothes on a clothes-line, and the high lead, with its simpler cable, direct from a central spar tree to the log.

And now this new monster, the caterpillar tractor, the "cat" as loggers call it—has invaded the woods with the roar of a huge engine and the uncanny skill of a living creature. It is only in its experimental stage yet, and no one can say what effect it is going to have on British Columbia's largest industry, but the loggers are giving it a chance to show what it can do in actual use.

Robert Filberg, who has pioneered in all logging methods and is now experimenting with this new machine, says that the cat is proving satisfactory on reasonably level ground, where it can operate, and probably as its technique is perfected will be more widely used. But, except in very limited areas, where it may be possible to remove one species of high-priced timber when the market does not justify cutting the remainder, it does nothing more than the high lead or any other method to preserve the forests. And even if it should be possible to log only a fraction of the growth, no commercial way has yet been found to remove the slash nor to save the remaining trees from blowing over when they are exposed.

In these problems the timber industry of British Columbia and the United States is making experiments now, but the results so far have not demonstrated that selective logging even with cats, is feasible, in the opinion of the provincial forestry administration.

Dies In Poverty

Hero Was Rewarded With Medals, But Could Not Get Work

They pinned medals on Salvatore Bracco, Italian-born American seaman, a few years ago for his heroism in two rescuees on the high seas. When the S.S. President Harding saved the crew of the stricken freighter Ignazio Florio in 1925, Bracco was the first into the lifeboat which took 38 men from the freighter just as it sank. He got medals from five cities and a scroll from Benito Mussolini for that.

Greater recognition came in 1929 when the S.S. America rescued the crew of the ship Florida off the Virginia Capes. First to volunteer for the lifeboat crew, Bracco directed the rescue work. Former Mayor James J. Walker gave him a medal for his heroism when his ship reached New York. Later he received the congressional medal of honor, two more medals from Italy and six from American cities.

Seaman Bracco died in New Jersey recently in poverty. Ill with heart trouble, Bracco had been supporting his wife and son on a weekly relief grant of \$7.50. "Those who pinned medals on me and shook my hand wouldn't give me a job," he complained bitterly to his son a week before he died.

Driving Tests For Tourists

British Associations Have Power To Examine All Visitors

Mr. Hore-Bellah, British minister of transport, has now made the motor vehicle (driving licenses) regulations, 1935, under which the R.A.C., the A.A., and the Royal Automobile Club can conduct driving tests of temporary visitors to this country.

Drivers are reminded that a licence will not be issued unless they hold a driving licence before April 1, 1934, or have passed the new driving test.

War Memorial Fellowship

Cecil Edwin Hall, Edmonton, was the winner of the First War Memorial Fellowship, \$500, it was announced at Toronto recently by the Alumni Federation of the University of Toronto. Hall is an honor graduate in physics of the University of Alberta.

Agricultural Production

Given Chance Alberta Will Show What She Can Do

Alberta is the leading hog producing province in Canada today. After having stood second on the list, following Ontario, Alberta in the first 15 weeks of 1935 jumped into the lead, overtaking the banner province. We're selling now more than a million commercial hogs annually.

The next time an eastern banker or manufacturer tells you that people of Alberta are soil miners or crop farmers, politely tell him he doesn't know what he is talking about. Tell him that we would be the leading cattle producer and the leading sheep producer if we could find a market; that the fact that we don't stand at the top in these two classes of livestock is that we are already over-produced; that we could triple our production of cattle and sheep, and will do so, when the market offers an opportunity to sell them. Tell him also that Alberta in 1934 broke all records in butter production with 25,500,000 pounds of factory-made butter, and that British Columbia dairymen are complaining that Alberta is "dumping" surplus butter on the coast province.

Just give Alberta a chance—give her markets—and we'll show the finest job of agricultural production to be found anywhere in the world. What we need is going into first place is only a hint of what we can do if we get the chance.—Lethbridge Herald.

Cavell Grave Neglected

Resting Place Of Martyred War Nurse Is Uncared For

Complains that the grave of Edith Cavell, the martyred World War nurse, is neglected have aroused indignation in English visitors to Norwich declare that evidently no care is given it. Nurse Cavell was born at Swardeston, a village four miles from Norwich, and lies buried in Life's Green, close to Norwich Cathedral. Some time ago the public was accused to protest against the scant attention paid to her last resting place, which many people from all parts come on pilgrimage to see. The responsible authorities, apparently the Dean and Chapter, took the matter in hand, but to-day fresh criticism has been directed against the grave. One observer declared that it is covered with rough gravel and seemingly had been a playground of dogs. On it lay the remains of a wreath of artificial poppies and a few bedraggled daffodils.

Recipes For This Week

(By Betty Barclay)

SOUR CHERRY JELLY

3½ cups (1½ lbs.) juice
7 cups (3 lbs.) sugar
1 bottle fruit pectin
To prepare juice, stem and crush about three pounds of ripe cherries. Do not pit. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. (For stronger cherry flavor, add ½ teaspoon almond extract before pouring.) Place fruit in jelly cloth or bag and squeeze out juice. Measure sugar and juice in large saucepan and mix. Bring to a boil over hottest fire, and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ¼ minute. Remove from fire, skim, pour quickly. Measure sugar and juice in about 16 glasses (6 fluid ounces each).

STRAWBERRY FROSTING

2½ cups confectioners' sugar
¼ cup sweetened condensed milk
¼ cup fresh strawberry pulp
1 tablespoon lemon juice
Stir sifted confectioners' sugar into sweetened condensed milk. Force enough strawberries through coarse sieve to make ¼ cup pulp; add with lemon juice to first mixture. Beat until smooth and creamy. Spread on cold cake. Makes enough frosting to cover top and sides of loaf cake, top of 2 (9-inch) layers or about 1½ dozen cup cakes.

Babies Like Blue Light

Does the baby cry? Turn on the blue lights to stop him! It doesn't work always, but that helps, Miss Josephine M. Smith, assistant in the University of Iowa's Child Welfare Institute, said at the American Association for the Advancement of Science meeting at Minneapolis. Miss Smith, discussing experiments with various hues of lights on infants seven to nine days old, said the blue hue was best.

Actor Stops The Show

A comic singer wearing a hat of the Mussolini type caused a theatre to be closed by the police in the port of Braila, Roumania. His act was an ironical song at the expense of Signor Mussolini, which was a considerable success—until the Italian consul heard of it. The following day the police closed the doors of the theatre.

Soft wood is often much harder than hard wood.

The common name of the cicada is "locust."

DON'T FORGET THE "CAT"
THE NEW HOUSEKEEPER (MR. BALDWIN): "Oh, yes, Mr. Bull, I'll see to the little dear! And I do hope you'll have a real good holiday, sir!"
—News of the World.

National Youth Administration

United States Offering American Youth A Chance In The World

President Roosevelt has established a "national youth administration" to meet what he called a "great national need" by offering unemployed youth of the United States their chance in school, their turn as apprentices, and their opportunity for jobs.

The new agency will be under the work relief program. The president set aside \$50,000,000 to be used in providing work, apprenticeships in private industry, in offering high school and college training for those between 16 and 25, and in giving relief to youths.

The new undertaking was put under the direction of Miss Josephine Roche, assistant secretary of the treasury, and Aubrey Williams, assistant to Harry L. Hopkins, works progress administrator.

Mr. Roosevelt, in announcing the plan to aid an estimated 500,000 of young men and girls, said:

"I have determined we shall do something for the nation's unemployed youth, because we can ill afford to lose the skill and energy of these young men and women."

An average payment of \$15 a month for youths on work relief was fixed; \$6 a month would be given to those going to high school and \$15 a month to youths in college.

Ran With The Hounds

Fox Used Great Cunning In Making Its Escape

During a meet of the Boyle Harriers' Hunt in northern Ireland, a fox broke cover and started across country, with the hounds following in full cry. Shortly afterward the hunter noticed what he thought was a strange dog running in the midst of the pack, but on getting closer he saw it was a fox. The intruder kept with the hounds, which intent on hunting another fox, took no notice of it. When the hunt was passing close to a brush-covered hill the "visitor" suddenly bolted into the brush and disappeared.

Beaver From Germany

So they're carrying coats to Newcastle. At the end of a long journey from Hamburg, Germany, 40 nutria, a species of beaver, arrived at Edmonton. They were imported for fur production in the land of the beaver.

When exposed to red or infra-red light, certain types of diamonds generate electricity.

Household Arts

Top your dress with handmade neckwear and you'll be right in step with Fashion's latest. With knitting needles clicking wherever you go, you will be right in the twin if you knit your neckwear. If crocheting is your choice the lovely lace jabot will fill your bill. The round collar is a simple lace jabot—points sold, the open part in a faceted effect. The vestee with turn down collar is straight ahead knitting in a simple pattern that is repeated throughout. And the whole thing is made of two straight strips, so what could be easier? The crocheted jabot is in one straight piece joined at the center. It is easy and has the flare that makes a jabot graceful.

In pattern 5374 you will find complete instructions for making the crocheted collar and the crocheted jabot shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. W., Winnipeg.

There is no Alice Brooks pattern book published

The Custer Massacre

Sioux Warriors Now Say Gen. Custer's Death Was Inadvertent

The killing of General George A. Custer—massacred with all his men 59 years ago—was "inadvertent," Barron Brown, an artist, said he had been told by participating Sioux warriors.

Based on an earlier friendship, Sitting Bull had ordered the General's life be spared, Brown was told by Little Soldier and other survivors of the band which defeated Custer at the battle of Little Big Horn.

"He was the last of the command to be killed," Brown was informed. "His death was inadvertent."

Brown said he had broken down the stony silence of the red man while painting portraits of the Standing Rock Reservation in North Dakota. There reside more than 20 participants in the famous battle.

They told him: Another American fighter, Reno, not struck at the retreating Indians, Custer would not have been attacked.

Rain-In-The-Face did not cut the heart out of Tom Custer, the General's brother, as some reports have stated.

The Sioux warriors did not mutilate their victims. That was done later by the old women and the youngsters.

Custer was not scalped. He had his long curly locks sheared off before the battle.

The reason the Indians stripped the whites of clothing was because they believed it would be needed during the retreat into Canada.

have been gained by Canadian with army rifles sold to them by dishonest government agents.

Abandon System

Ontario Is To Discontinue Relief Work On Roads

Hon. Peter Heenan, Ontario minister of lands and forests and northern development, announced at Port Arthur at a banquet in celebration of the opening of the Great Lakes section of the Trans-Canada highway that the Ontario government will, in future, let contracts for its road building.

The relief camp system, under which jobless worked at highway construction, was at least twice as expensive as the method proposed by the government, he said. A mile of road could be built by a contractor, for half the cost of the relief camp system.

Under the camp system, Mr. Heenan said, with a \$5 a month allowance for the men, a section of road in northwestern Ontario had cost \$55,000. A contractor would build it for half that amount and would have paid fair wages.

Widely-Known Physician

Dr. McCrae, Brother Of Canadian Poet, Dies In Philadelphia

Dr. Thomas McCrae, widely-known physician and author of medical works, died recently in Philadelphia, weakened from an operation. He was 64 years of age.

Native of Ontario, Dr. McCrae was a brother of the Canadian poet, John McCrae, a lieutenant-colonel in the Canadian Army Corps. He was an assistant of Sir William Osler.

For 23 years, Dr. McCrae had been professor of medicine at Jefferson Medical College, Philadelphia. In 1927 he was physician to J. Ramsay MacDonald, when the then prime minister of England visited the United States.

National Crisis

Monaco Is Suffering From The Effects Of Depression

Monaco, where fortunes are lost and won on the turn of a wheel, is seething with unrest in a national crisis born of the depression. The country's budget is unbalanced, hotels and shops are nearly empty and unemployment is widespread among the 22,000 inhabitants, whose principal work is serving tourists.

Gambling receipts for the year ending March 31 were estimated at 70,000,000 francs, a drop of 24,000,000 from the 1931 figure.

An Expensive Habit

A city girl was passing her summer holiday on her uncle's farm. On the day of her arrival she went with him to see his herd of cows.

The girl gazed with interest at the beasts, especially one that was chewing the cud.

"Fur animal, that one," said the farmer, following the direction of her glance.

"Yes, said the girl, 'but doesn't it cost you a lot to keep her in chewing gum?'"

To Fit The Crime

In England, says the Toronto Star, motorists convicted of reckless driving have their driving licenses suspended for two years. In Czechoslovakia the policeman does not arrest a speedster and cause him to be fined. He stops the car, lets the air out of all four tires so that the speedster has to tarry a while and pump his tires full again.

All men are born free and equal, but most of them get married.

Little Journeys In Science

(By Gordon F. Guest, M.A.)

Many years ago John Dalton, an English schoolmaster, gave to science the very important theory concerning the structure of matter. This theory, which is known as the atomic theory, assumes that every chemical element, such as oxygen, iron, or gold, is made up of small indivisible particles called atoms; that the atoms of different chemical elements have different weights, but those of a particular element are alike and constant in weight; and that chemical compounds, such as common salt and water, are formed by the chemical union of the atoms of different elements. Thus, an atom of sodium combines with an atom of chlorine to form the smallest particle, known as the molecule, of table salt, while two atoms of hydrogen combine with one atom of oxygen to form a molecule of water.

Recent studies of the properties of matter force scientists to assume the existence of particles still more minute than atoms; so Dalton's idea of the atom has been changed somewhat. The modern scientist believes that an atom is composed of tiny particles of negative and positive electricity, respectively known as electrons and protons. Although a proton weighs as much as 1845 electrons, its positive charge is exactly equal to the electron's negative charge. Each pulls as much as the other.

There are 92 elements and hence there are 92 kinds of atoms. Hydrogen atoms, consisting of only one proton and one electron, are the lightest. Uranium atoms are the heaviest, having 238 protons, and 238 electrons. In all atoms the electrons are alike and interchangeable, like standardized bricks used in all sorts of buildings. It is believed that the electrons are revolving around the protons, which are located in the centre of each atom, as much as the earth and the other planets revolve around the sun.

Under normal conditions the diameter of hydrogen atoms is estimated to be about a hundred millionths of a centimetre (254 centimetres equal 1 inch). This estimate is about twice the usual distance of its electron from its nucleus. The size of an atom is not known with accuracy but it is a very small fraction of the size of the whole atom. The nucleus, or central sun, appears to be still smaller. It is almost a vacuum. It has been calculated that if the nucleus of a helium atom were represented by a pea, its two planetary electrons could be represented by two peas a quarter of a mile away.

A normal hydrogen atom is estimated to be about a hundred millionths of a centimetre (254 centimetres equal 1 inch). This estimate is about twice the usual distance of its electron from its nucleus. The size of an atom is not known with accuracy but it is a very small fraction of the size of the whole atom. The nucleus, or central sun, appears to be still smaller. It is almost a vacuum. It has been calculated that if the nucleus of a helium atom were represented by a pea, its two planetary electrons could be represented by two peas a quarter of a mile away.

The information concerning the structure of atoms has been obtained by the wonderful instrument known as the spectroscopic, by X-rays, and from a study of such elements as radium, which are continually breaking down into other elements.

Weapon Of Serbian Heroes Was Made Of Nickel Steel

The old Serbian "heroes" of the Dark Ages, according to legend, were armed with a weapon which cut through their enemies' armor. Now a mining prospector, examining ancient workings in old Serbia, believes he has discovered the secret of those "magic" weapons.

They were made, not of iron, but of nickel steel. In an old working he came on a piece of metal which is probably the oldest piece of special steel in existence. In vain he tried to bore a hole in it. Finally he sent it to Vienna to be examined. Here again difficulty was experienced in piercing it and the analysis showed that it was nickel steel of peculiar hardness. The circumstances under which this piece of steel was found suggest that it is at least 1,000 years old—that is, it was in existence 900 years before nickel steel was rediscovered.

London's Health Resorts

Two Districts Have Genuine Claims In This Respect

Not many people regard London as a health resort, but it is a fact that the Tower and Aldgate districts have genuine claims in this respect. Nor is the reason far to seek. Two tides of sea water come in the Thames daily, bringing with them ozonized air which blows along the broad dockland roads and strikes the City right at the Tower of London and Aldgate. Prevailing westerly winds apparently meet this tidal air higher up the river, with the result that many swanky districts do not enjoy the same salubrious atmosphere as some in the despoiled East End—Glasgow Bulletin.

A Party Platform Is A Mighty Important Consideration," said one statesman.

"Yes," replied the other, "a party platform in politics is a good deal like a bunker in golf. The rules require it, but you show your skill in avoiding it."

Boys are not as good sleepers as girls, according to tests made by an Atlanta physician. His conclusion comes after 150,000 hours of watching children sleep, by means of special electrical instruments.

"The Unknown Tort," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Cousin Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general look of poverty.

No Go On With The Story

CHAPTER VII.—Continued

"It's gorgeous, isn't it?" breathed Nancy, truly impressed. "I'm sure I'm going to love this room." Cousin Columbine smiled.

"It's our best, and I'm glad to see that you appreciate it. Jack will be next to you with only a door between. I sleep downstairs; and as I stated in my letter, Aurora goes home at night. Victor Tubbs is an invalid, or thinks he is, which amounts to the same thing, and his wife has supported him for years in a state of affairs that satisfies them both, though it makes me furious. However, it's none of my business; and if Aurora wants to work her fingers to the bone for such a lazy specimen, why worry, as Mark Adam would say? Now I'll leave you in peace. No doubt you'll prefer to unpack alone though Aurora was itching to see your wardrobe, and if she had, not so much as a safety pin would have escaped her eyes, and the account would have been spread from one end of Pine Ridge to the other before she slept tonight."

The old lady moved toward the door, then stopped to add: "If you need a lamp, the matches are in that tin box on the wall. Supper's at six sharp, so Aurora can start home to feed her precious Victor. There's water in the pitcher; but you may wash in the bathroom if you prefer."

She was gone at last, leaving Nancy rather breathless with instructions. Jack had departed to his own quarters, and the girl stood quite still, looking about curiously. She had meant the view, of course, when she told Cousin Columbine that she loved the room. Now, sitting down suddenly on a straight, uncomfortable "bedroom chair," she wondered how it was possible to get so many ugly things into one place.

The bed! Towering black walnut, ornately carved. It was cold comfort to remember that her grandfather had had one almost as hideous at Edgemore, a bureau to match, even a washstand, behind which

hung a square of linen to protect the wall paper. Hadn't she heard somewhere that they were called "splashes" in the dark ages when "splashes" used such things?

Nancy arose to regard this curious antique on which, embroidered in red cotton, was an infant splashing happily in a wash bowl, with the words: "Darling, don't splash!" Horrors! Must she live with that monstrous baby for months and months? Must she wash in that bowl—even brush her teeth into it?

The girl could have wept for her own tiled dressing room; then remembered that it was hers no longer anyway. She turned slowly to observe a marble-topped table between the windows—a patent rocking chair upholstered in flowered carpet—a shelf above the air-light stove on which stood two blue vases and what appeared to be a mound of mineral specimens mysteriously glued together, with a clock in the centre, a silent timepiece now, probably useless save as an "ornament."

Nancy's eyes lifted to the wall paper, a nondescript, faded tan, she decided, "might be worse." But the pictures slowly took shape (goodness!) were simply terrible: an oil painting of a deformed looking kitten playing with a ball of yarn, and a steel engraving of General Grant. Could anything be more depressing?

As if to get away from all these objects, Nancy moved to a window, half sick at thought of the long weeks ahead. Night was descending, and even the Peak, rising now against a gloomy sky, looked austere and forbidding. All the excitement of their arrival—the climb in the hotel, the wonderful ride in Mark Adam's flyover—her interest in this new part of her own country—even the girl's sense of humor, were lost in an attack of overwhelming homesickness.

Aunt Louise had been right, she told herself. They shouldn't have come so far away. This terrible room! What would the girls at home think if they could see that washstand? And the pin-cushion. Why it was bigger than a boudoir pillow!

And what in the world was she going to do with herself when the duties that Cousin Columbine imposed were finished? There would be nothing—absolutely no way to kill time. This thought, to pleasure-loving Nancy Nelson was appalling. Her unhappy eyes, resting on Pike's Peak, saw only a closet filled with dancing frocks, and a white fur wrap that she had never worn. She had to wink to keep the tears out of her eyes as she vowed silently:

"I'll write to-night and tell Dad everything. Didn't he say that homesickness might as well be fatal? He'll understand. He'll send for me if he has to borrow money for the ticket. Jack will call me a slacker, but who cares? I just can't stand it here. I'd almost rather die than stay. What can there possibly be to interest a girl like me in a dreadful, ramshackle, down-at-the-heels settlement like Pine Ridge, Colorado?"

Later Nancy was as shocked to everything save self-pity, she hadn't known what sort of girl she was.

CHAPTER VIII.

"There's nothing," observed Jack from the door of his north-east bedroom, "like good, thick sirloin steak to bolster up a morale that's slipping. Remember that, Sis."

It was eleven at night, and Nancy, attired in a wadded dressing gown of crimson silk, turned from the bureau to ask coldly: "May I inquire whose morale you have in mind?"

Her brother smiled as he investigated the patent rocking chair.

"I'm no moron, Nance. I knew when I found you staring out of the window in the dusk, that you were planning your escape. That's why I opened the door that night. The aroma of broiling steak was in the air and I felt sure it would revive that fainting spirit—stiffen the backbone—stir your pioneer blood."

"Hush up," warned Nancy. "Our voices will disturb Cousin Columbine, and she admitted sitting up on an unheard of hour. Say!" the girl came nearer, whispering: "Did you ever see anything more—more soul destroying than this room?"

Jack grinned, gesturing with a thumb toward his own quarters that he should see more. "Not even a view, my dear; and it lacks this handsome walnut furniture." The boy's eyes shone with merriment; and though she wouldn't have believed such a proceeding possible a few hours earlier, Nancy laughed a little. She didn't realize that after a leave of absence her sense of humor was returning, but she knew that something made her feel better.

"It was a wonderful supper, wasn't it?" she murmured.

"Trust you to appreciate it! And what swell china! I wish Aunt Lou could see it."

"It came from Denver in 18—well, eighteen—something-or-other, anyway. There's a complete dinner set. Imagine choosing that awful green-brown pattern! And Cousin Columbine's so proud of it, too. How on earth does she remember the date that everything was purchased?"

Jack shook his head, remarking in muffled tones: "She's a wonder, isn't she? Who else would have thought

of cooking up that letter as a—what did she call it? Character test. You've got an awful lot to live up to, Sis, if you ask me. Hop into bed. I'll open the window. And don't forget that breakfast's at seven sharp."

Sleep did not come quickly to Nance that night. She lay there under a patchwork quilt whose weight, she wrote Aunt Judy later, was "almost crushing," and thought about the evening that had just passed. There must be some truth in Jack's statement regarding the sirloin steak. What else could account for her more cheerful frame of mind?

For Nance had been ravenous despite that rice of chocolate cake—the ugly, green-brown china, and a lamp in the centre of the table that was homely enough to ruin almost anybody's appetite.

There was no doubt that Aurora could cook a steak; and with unexpected tact, Jack had done most of the talking, leaving his sister free to get herself in hand after what she now called her "brain storm."

And when Aurora laid down, Jack carried that awful lamp into the sitting room and Cousin Columbine remarked casually, though her eyes twinkled: "I suppose you're thinking me an outrageous humbug. Sit down, my dear, while I confess."

The confession with its illuminating detours into the past, had kept Cousin Nelson talking until long after her customary bedtime.

"I'm going back back to the beginning," she explained, "so you'll understand, if possible, just why I posed as a testing old relic, too frail to stay alone at night. The truth is, there's nothing to be afraid of here, and if there were I wouldn't turn a hair. To one who could remember the Indian troubles of 1868, and as a child has hidden for hours in fear of hostile savages, well—you can readily see why an ordinary prowler would be tame in comparison."

She looked up, smiling; while Jack, eyes popping out of his head, exclaimed: "You really lived through things like that?"

"Why not?" asked the old lady calmly. "This was nothing but wilderness when I was born. As you've heard tell, my first home was a covered wagon which, naturally, I don't remember. Do remember a house with a dirt floor and a fireplace in one corner, however; and dimly recall the furniture made from poles and rough-hewn lumber. It was home, and nothing to be ashamed of because no one else nearby had anything better."

"But wasn't it frightfully cold?" said Nancy. "A dirt floor, I mean?"

"I suppose it must have been—at this altitude; but Mother took care that I shouldn't suffer, of course. I can remember being tucked up on the bed, except for the thought of watching the snow swirl against a tiny window, and loving it—I was so warm and cosy! It was my mother who suffered. Men can stand hardships better than women; and even in those days Father seemed always to be well, my dears, to express it as you would, he seemed to be having the time of his young life."

"Did that cabin stand where this house does now?" Jack questioned.

"Very rarely. There was a bleak spot then. Except for the big pine beside the barn, Father planted every tree himself after he built the mansion."

"But why, when there was plenty of land to choose from, didn't you build back in the woods where it was sheltered?"

"Fear of two things," responded Cousin Columbine. "Fire, and Indians. If the savages were to attack us, we at least had a chance to see them approaching if we were in the open. And a forest fire's a terrible thing in the wilderness. Jack, I recall when I was a tiny girl, watching one at night with my courageous little mother. We were all alone, Father having gone to California. Jack in search of gold."

Looking back those times, I don't see how she endured his absence, even though there were other cabins not far away. That fire was a terrifying sight, my dears. It must have been miles off, but looked almost near enough to touch. The growth was very thin and tall just there, and the flames seemed to leap from tree to tree, and as they reached the top, shoot up into the air, far up, higher than you'd believe possible, before subsiding. I have never forgotten it."

Nancy shivered; and Cousin Columbine continued: "So you see why we built in this bare place."

"And did your father find the gold?" Jack questioned.

"Not then. Not ever to any great amount. It was Leadville silver which built this mansion; but poor Mother never saw it. She died in 1874, when I was fifteen. A wonderful woman, my dears. She had the true pioneer spirit, but not the body to stand up under the pioneer hardships. She was only thirty-five when she left us to join my little brother who died in infancy."

(To Be Continued)

Liocres is used in fire extinguishers. It contains a saponin, or froth-producing substance, which smothers the fire.

Sound travels four times faster through water than it does through air.

WAS CONSTIPATED FOR 30 YEARS

Woman's Long Search for a Remedy

The trouble with most remedies for constipation, as this woman found, is that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that it was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after which I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning at five o'clock, and every evening at eight o'clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

Still Widely Read

People Have Not Lost Taste For Mystery Fiction

Prediction of literary prophets that the craze for mystery fiction was on the wane and would soon be ended does not seem to be working out that way. For the last half dozen years wise-acres in the book world have persistently stated that the modern detective story was losing ground, that its day was about done. The public, they said, had sickened on the diet of murder and horror which was being served up to it, and that other forms of light reading would take its place. Perusal of circulation cards in the public libraries does not bear out this opinion.

To-day the mystery story still remains one of the biggest sellers on the book store shelves. And it is most emphatically not because mystery fiction has improved. It hasn't.—Chatham News.

Always Remembers Queen

Many Human Traits Are Displayed By King George

In his recent address to Parliament, King George referred to Queen Mary not as "The Queen" but as "my dear wife." "I have been blessed," he said, "these five and twenty years by having my dear wife beside me."

King George is not alone the dutiful husband but he is also the thoughtful one. At the recent Air Force dinner to the King he was served with some fine strawberries from South Africa. Calling the head waiter, he asked if he might have another order to take home to the Queen. "She enjoys special treats," he said in explanation.

Such little human traits have deeply strengthened the hold the royal pair have on the affections of the people.

Government To Hunt Gold

Machine Bought To 'Save Gold Wasted In The Mint'

The Canadian government is going to hunt for gold. It won't be in the far north, along fast-running streams or deep in rock-bound soil. It will be held right in the government's own mint.

Finance Minister E. N. Rhodes told the House of Commons a machine costing \$110,000 was being established in the mint to wash cases which were suspected of carrying only 1,000 ounces of gold each year. The washing machine was expected to pay for itself in three years at the rate of \$35,000 a year.

New Motive Conveyance

Los Angeles Inventor Has A One-Wheel Motorcycle

Walter Nilsson, 39-year-old Los Angeles inventor, rode his "unicycle," a one-wheeled motorcycle, through downtown streets recently. The invention is a wheel within a wheel. A one-cylinder motor drives the outer wheel forward.

Nilsson rode the "unicycle" 18 miles an hour. The inventor said the wheel would travel 100 miles an hour. It now has a solid rubber tire.

The rider is inside the wheel, which is steered by a secret device.

Had Laugh On Inspector

Pomposity entering a train at Chomutov, Bohemia, a ticket inspector examined several tickets and ordered the holders to change at once because they were on the wrong train. As he made his way through the cars he found more passengers he thought should move. Then one of them had a bright idea and asked the inspector whether he was not in the wrong train. He was.

During the course of an ordinary year, 8,000 marriage licenses issued in New York city are subsequently never used for the marriage ceremony.

Motor Vehicle Sales

Sales In Four Western Provinces Show Greatest Improvement

New motor vehicle sales in Canada in May amounted to 16,536 units, of which 13,835 were passenger cars and 2,694 were trucks and buses, according to a report issued by the Dominion Bureau of Statistics. Sales for the five-month period numbered 84,100, which was 10,788 more than were sold during the entire year 1933.

For the first time during the four years in which the retail sales of motor vehicles have been compiled, the Dominion total for May is smaller than the total for April. On the other hand, the increase in April this year over March was much larger than in any of the preceding years. Retail sales of new passenger cars in the first five months of 1935 were 67,127, an increase of 32 per cent. over the corresponding period in 1934, while the gain recorded in sales of trucks and buses was 75 per cent. over the same period.

Sales in the four western provinces show the greatest relative improvement over May, 1934, both in the monthly and the five-month totals. During May, 1935, Saskatchewan recorded a gain of 84 per cent. in new passenger car sales over May, 1934, while British Columbia, Manitoba, and Alberta follow closely with increases of 52, 42, and 36 per cent. respectively.

Production of automobiles during May totaled 20,765 units, a drop of 14 per cent. from the April output of 24,123 cars but still three per cent. above the 20,161 made in May of last year. For the first five months of 1935 production amounted to 95,584 cars compared with 68,179 for the same period of last year, exports amounted to 28,705 against 18,613 and imports were reported at 2,269 compared with 1,519 in 1934.

THE RHYMING OPTIMIST

By Aline Michaelis

THE DREAMER SINGS

Give me a star in the tree tops
And a willow tree by the wall
Then you of the world can have your world

With its splendor and pride and all
Ever the star has charmed me
As in depths of space it has swung,
And the whispering leaves have
Brought me peace
With the little songs they have sung.
Echoes have reached me faintly
From the world which lies without,
I have heard of its subterfuge and strife
Of its mazes of hate and doubt.

Give me a star for promise
And a tree to sing me to rest,
Then you who love toil and bitter strife
Can have my share of the quest!

Visits Ancestor's Home

Duchess Of Kent, Descendant Of Mary, Queen Of Scots

The Duchess of Kent is the first descendant of Mary, Queen of Scots, to stay at Holyrood Palace as wife of the lord high commissioner to the general assembly of the Church of Scotland.

An ancestor of the former Princess Marina of Greece was Frederick of Bohemia. He married a daughter of James VI of Scotland, that son of Queen Mary who became the first King of Britain in 1603.

The visit was the occasion for brilliant scenes in the Scottish capital. Recognizing the Duchess as a leader of fashion, women attended the various functions at which the royal couple was present, attired in ultra-smart outfits. Customers and dreamers reported a rush of business.

Enters Gentle Class

The breathless onion is almost ready to make its appearance on the comic scene, Lloyd Shanklin, G.G.P., president of the United Brotherhood of Vegetarians, announced. Shanklin said the new onion was so different from the present fearful species that it didn't even taste like an onion. It is odorless and stainless.

China's first all-Chinese golf tournament in Shanghai was won by J. M. Tang, aged 49.

Babies and pianos would make less noise if grown people let them alone.

Historic Rock Blasted

30-Foot Lip Overhanging Gorge Slips Away

With flashes of flame and a rumbling that introduced a new note into the age-old symphony of the Niagara cataract, 3,000 tons of rock were hurled into the gorge at the foot of the falls at Niagara Falls, July 1st, as two explosions shattered part of Table Rock, famed look-out point at the brink of the falls.

While a holiday crowd estimated at 40,000 persons viewed the brief spectacle from United States and Canadian sides of the river, 1,000 tons were blown into the gorge. Scenic beauty and contour of the falls was unaffected.

Preparations for the blast have gone on for a month. Eighty-five holes, each 15 feet deep, were drilled into the lip which had a length of 150 feet and a thickness of 15 feet. Into each were placed three sticks of dynamite and five pounds of black powder after the holes had been dried by compressed air.

The ledge, estimated by parks commission officials to contain more than 5,000 tons of rock, was blasted because of the spot which came to be called Honeycomb Point, after visits of scores of honeymooners—was declared unsafe due to erosion.

Not A Recent Discovery

Ailing Indians Used Healing Sulphur Springs At Banff

Long before the coming of the white man the healing qualities of the hot sulphur pools at Banff, Alta., were known to the red men. It has been established that the natives lowered their ailing, by means of long thongs, into the water now known as the Cave.

Following the discovery of the Cave by William McCordell, Thomas McCordell and Frank McCabe in 1883, bathers descended a 45-foot pine pole ladder to reach the water. As the only means of ingress and egress was through a small hole in the roof this was often accomplished, and particularly in the cases of the somewhat corpulent with a loss of a certain amount of epidemics.

Shortly after the discovery of the Cave, came that of the Upper Hot Spring; there, where the water flowed directly out of the face of the mountain slope, and at a higher temperature than at the Cave, a small "pond" was excavated, a pine branch "pick-up" placed over the opening, and dressing and undressing purposes, and despite the stiffer and longer climb to it, became the premier "cure" bath.

Great Aid To Buyers

Newspaper Advertising Helps People Who Purchase By Phone

Modern life is much different to-day from what it was a decade ago. To-day, a great deal of buying is done over the telephone.

This, in turn, means that opportunities for purchases advantageous to the buyers are now almost completely centred in newspaper advertising.

The modern housewife knows what she wants, knows by brand name, and orders in that manner—because advertising has taught her how she should do it and why it is profitable for her to do so.

Imagine ordering from an unknown grocer "some coffee food," "some bacon," "some coffee," "some bread"—and so on, as in the olden days before advertising became the powerful force it is to-day!

Seen But Not Heard

Giraffes have not a single vocal cord in those long necks of theirs, which is the reason they are like good little girls and boys and are seen, but not heard. For giraffes hardly ever make a sound.

The spring flow of 23 rivers in White Russia is being studied to ascertain the power resources of Soviet Russia.

What's wrong with this Mustard, Mary? It's poor stuff! Why John—

I thought I was getting a bargain—a big bag for 10c.

"It's no bargain at all! I'll bet you would get more actual mustard in 10c worth of Keen's than you would out of any 10c substitute. The extra bulk is only flour, ground up hulls and colouring matter!"

"You're right! From this time on I'm going to stick to Keen's."

KEEN'S D.S.F. MUSTARD

Made from seed grown especially in the Fens of England. The shells or hulls are removed, all the virtue being in the inner part of the seed. A mustard grinding makes the full flavour readily available. Its original tin for as little as 10c.

Little Helps For This Week

The righteous shall be glad in the Lord and shall trust in him. Psalm 44:10.

The heart that trusts forever sings.
A well of peace within it springs.
Whatever today, tomorrow brings,
It is His will.

He will weave no longer a spotted life of shreds and patches, but he will live with a divine unity. He will cease from what is base and frivolous in his life and be content with all places and with any service he can render. He will calmly front the morrow in the negligency of trust that carries God with it, and so hath already the whole future in his heart.—R. W. Emerson.

He who believes in God is not careful for the morrow but labors joyfully and with a great heart. He must work and watch, yet never be careful or anxious, but commit all to Him and live in serene tranquillity; with a quiet heart as one who sleeps safely.—Martin Luther.

First Horseless Brigade

May Decide Future Organization Of British Army

The first horseless brigade in history has taken the field under its commander, Major-General H. M. Wilson, and has fought its first "engagement."

This experimental brigade may decide what the future organization of the British Army is to be. The elimination of the horse and mule has brought about a collection of steel substitutes varying in utility and speed from the pedal bicycle and motorcycle to the high-powered automobile and truck.

General Wilson and his officers will study the problem of the efficiency of cars and trucks in the replacement of chargers and mule teams.

Assistance For Fishermen
Fishermen will be able to obtain capital from the government at low interest rates on the same basis as farmers under a bill of which notice was given by Hon. Grote Sillings, minister of fisheries. It is proposed to make \$300,000 available for loans to fishermen through the Farm Loan Board.

The spring flow of 23 rivers in White Russia is being studied to ascertain the power resources of Soviet Russia.

RELIEVE PERIODIC PAIN

If you suffer periodic pain and discomfort, try one of the Fido Tablets. In most cases they bring welcome relief. Mrs. Caroline Newman says, "They ease the pain."

Mrs. Raymond Chaput, Route 4, Tilbury, Ont. says, "I suffered from terrible headache. Had such headaches I was worn out. Your Tablets helped me. Let them help you, too. Ask your druggist."

"The Car that has Everything" But High Price and High Upkeep

The Oldsmobile Six Four-Door Sedan Deluxe Coupe

MANY influences guide the buyer's choice of a new car. Some people are attracted by appearance, some by performance and riding comfort. For others there are the appeals of economy, reputation and dependability. Oldsmobile merits your consideration from all these standpoints, because it's "The Car That Has Everything."

No car on the market has a finer reputation for dependability than Oldsmobile. Few measure up to the beauty of its streamline design. Feature for feature, Oldsmobile holds its own in any company, with solid steel "Turret Top" Bodies by Fisher; Hydraulic Brakes; Knee-Action; Synchro-Mesh Transmission; No-draft Ventilation, and other modern developments.

In spite of all this an Oldsmobile Six costs but a hundred dollars or so more than the average small car. Operating expenses are no greater. But see for yourself. Drive the Six or Straight Eight. Discover why so many people say so many nice things about this great automobile.

MAN'S DEATH IN CALGARY IS MYSTERY

CALGARY, July 12—Mystery surrounding the discovery of a man shot through the head in an apartment room Thursday deepened last night when it was learned it was Kirk Jensen, a tapper, and not Percy Herman who police believed had killed himself.

Police were attempting to find out whether it was murder or suicide. Earlier in the day it was believed the body was that of Herman. Investigators were puzzled however, when search of clothing in the room revealed papers bearing only Jensen's name.

The apartment proprietor, W. Warner, was called and he told police it was not Herman. Police are searching for Herman who has not been seen since Wednesday afternoon.

Police said the apartment room was locked on the inside. The body was found on a bed with a .22 repeating rifle holding a discharged shell nearby. Coroner Dr. Johnson said a bullet entered the left ear and continued upward to the top of the head. Powder burns were found around the ear. Dr. Johnson said an inquest would probably be held.

WOMAN DROWNS CHILDREN

LINDSAY, Ont., July 22—Behind an abandoned distillery, 35-year-old Mrs. Guy Wallace threw her five children into the winding "Scourge" river at dusk Saturday night. Three drowned. The oldest, 11, and the baby were rescued. The mother is held on a nominal charge of vagrancy. Drowned were Catherine, nine, Agnes, seven, William, four, and eleven-year-old Gavin, who was rescued from the weedy water, his mother said she helped him, onto the six-foot log at the river's edge where the five had been standing in the intense heat. Baby Mary, little more than two years old, floated and was saved by a boy who heard the children's screams.

"I have thrown my children in the river," the woman cried as she ran to the Roman Catholic parish house apparently seeking a priest to administer the last rites to the children dragged from the water.

Rev. Earl Grant said this was

the only coherent statement among her hysterical remarks. Police held secret a statement Mrs. Wallace was reported to have made.

The ladies of St. Cyprian's W.A. are serving afternoon tea and having a sale of baking and needlework in aid of the Renovation of the Church Fund, by the courtesy of Mr. L. Sandbrook in the Cozy Resort, Aspen Beach, on Wednesday, August 7, 1936.

WIN TOURNAMENT

Members of Lacombe Rebekah Lodge 101 are invited to attend a lawn social at the home of Miss E. Shaw on Tuesday afternoon, July 30th. Bring work.

A Great Lakes Holiday

With the increasing popularity of vacation trips on the Great Lakes, the Canadian Pacific has expanded its Great Lakes Steamship service to include calls at Port Arthur on westbound voyages as well as eastbound. The Great Lakes make this continent almost unique for an inland sea voyage, part of which is entirely out of sight of land. Attractions that have been drawing an increasing number of passengers include a change of air, refreshing coolness, magnificent scenery, complete rest, and all the joys of shipboard. The Canadian Pacific Great Lakes steamers this year have been outfitted with a deck sports, including aquila, shuffleboard, and deck golf. Dancing and music bring pleasure to the evening hours. The schedule makes it possible to take an enjoyable week's trip, going either way, with overnight stops at both ends. Sailing Saturday, the round trip is completed the following Friday. Sailing Wednesday, the round trip is completed on Monday. The steamers leave Port McNicoll at 6:00 p.m. on Wednesdays and Saturdays, arriving at Port Arthur at 6:45 a.m. and Port William at 7:50 a.m. on Mondays and Fridays, in time to connect with train leaving dock at 8:00 a.m. eastern standard time, making connections with train No. 1 leaving Port William station for the West at 7:45 a.m. central standard time. On the eastbound trip departure time is 12:00 noon from Port William on Saturdays and Wednesdays, 1:00 p.m. from Port Arthur, arriving at Port McNicoll at 8:00 a.m. eastern standard time, on Mondays and Fridays. Port Arthur was in the schedule for an eastbound call but the call on the westbound trip has not been in effect for several years. Attractive all-expense tours at very low cost have been arranged to provide happy combinations of rail trips overland and steamship cruises across the Lakes, with leisurely stop-over at famous vacation resorts. There is a nine-day westbound tour between Toronto and Winnipeg and a ten-day eastbound tour from Winnipeg to Niagara Falls, with return trip in both cases.

BRUCE McMILLAN, TEES, IS ABERHART NOMINEE

On Monday evening Mr. Aberhart announced his candidates in all Alberta Constituencies. Bruce McMILLAN, well known Tees farmer is the selection for Lacombe. R. E. Ansley gets Ledoux.

President Lacombe Old Timers

BASEBALL TOURNAY

On Sunday, July 28th some of the leading baseball (baseball) players in Alberta have decided to spend the day at Gull Lake and will endeavor to show us what real baseball is like. Eckville boasts that its team has not been beaten in a game so far this year, and have challenged Central Alberta League All-Stars to meet them here to play two games. The 1st game is called for 2:30 p.m. and the 2nd at 6:30 p.m. sharp. Everybody come and see some real baseball.

AT THE AVALON

"West of the Pecos" In the lusty, red-blooded romantic type of story which he adores, Richard Dix, in his latest RKO-Radio picture, "West of the Pecos," has scored another triumph.

"Pecos Smith," whom Dix portrays, is reminiscent of his earlier creation, Yancey Cravat, in "Chinatown," and the picture is packed with excitement, tense situation, hard riding, straight shooting and all the other ingredients of the successful action picture.

Also Barbara Stanwyck in "The Bitter Tea of General Yen." Coming: Greta Garbo in "The Painted Veil," Aug. 1, 2 and 3. "Little Minister," Aug. 8, 9, 10.

THE CHURCH OF ENGLAND IN CANADA

St. Cyprian's Church, Lacombe. There will be no services Sunday next, July 28, 1936.

COTTAGE TO RENT

Comfortable 5-room, cottage to rent. Good locality. Apply Mrs. P. MacDonald or phone 62.

"UNDERNOURISHED FOOL" WOMEN OF ALBERTA

The ladies of the U.F.W.A. are not about to be indignant over Mr. Aberhart's designation of their organization. He is pleased to call them the "Undernourished Fool Women of Alberta."

Although mud-slinging is quite common during election campaigns, we doubt very much if a statement like the above has ever been used before in the province. It is a distinct slur cast not only at members of the U.F.W.A. but at every woman in the province. Why he would make a statement like that is beyond us, but we guess it is just like his other wild statements-made for the purpose of drawing applause from his city audiences. Mean slurs and disparaging remarks against his opponents seem to feature every one of his broadcasts. One third of his average broadcast is taken up with the "Aberhart-Manning duel"; the other two-thirds is mud-slinging and denying things he says he did not say.

That statement about the U.F.W.A. holds an unique place in Aberhart's political campaign to date. It is the only statement he has ever admitted making. He not only admitted making the statement, but humbled himself by saying he "regretted saying such a thing." His apology will most likely be accepted by the women of Alberta. All his regretting does not alter the reflection he cast. The fact is that he made the statement. It is not the kind of statement that just slips out in the heat of a speech. It is a statement that has to be thought out in order to get words to correspond with the letters in the signature of the U.F.W.A. organization. The statement must have been prepared before the broadcast, and written into the script for the speech. The slur was deliberately cast for the sole purpose of belittling and injuring the U.F.W.A. organization. The nature of the statement should nullify any or all of his apologies. He must have had ample time to consider whether he should make the statement or not. He no doubt realizes now that the farm women are not as big fools as he evidently believed them to be. He realizes that they will not be fools enough to vote for a man who holds them and their organization in such disdain. Hence his apology. He also realizes no doubt that every member of this organization has a vote, and would not use their ballot to support a person who would try to discredit their organization.

It is one thing to disparage his opponents in his political campaign. It is quite another matter to disparage the women of Alberta. The women of the province in general and the U.F.W.A. in particular have not to our knowledge entered into the present campaign. So for what reason are they made the brand of such an attack? Does Mr. Aberhart think their votes are unnecessary to his political success? Does he think they will vote for him no matter how he belittles them? Has he such a good opinion of himself that he thinks he can make a nasty statement like the above and then

clear himself by simply saying that he regretted saying it. He will probably regret the above statement to a greater degree on election day. Every woman in the province should take his "venomous remark" to heart and cast their votes solidly against his party. It is a reflection on every woman in the province and should be treated as such.

His speakers about the province might say that they are not responsible for any statements Mr. Aberhart makes; but the ladies of the province should hold them responsible, nevertheless. Their leader sets the example. His speeches reek with intolerance and his speakers are equally intolerant. Almost every organization in the province has been made the butt of an attack by him or his candidates at one time or another. No one or no organization that has different views than himself escapes his tongue-lashings. Never before in the history of Alberta has a person leading an election campaign disclosed such a bigoted and biased policy. He has offered the people of Alberta absolutely nothing possible of fulfillment, but expects them to follow him regardless. His entire policy is based on wild and empty promises. His misleading statements and misrepresentations feature all his addresses. So far in his political campaign he has only been pinned down to one statement, and that statement is the "Undernourished Fool Women of Alberta."

He should be made to remember that this discourteous statement will be used against him to the utmost by the good ladies of the U.F.W.A. and all the ladies in Alberta.

YOU CAN'T TELL AT THAT

He stopped at a filling station in Moose Jaw on Thursday to have his car overhauled and among the articles of baggage noticed by attendants was a pair of skates. The tourist who came from Chicago, was en route to Banff, he stated, and explained the presence of the skates with the remark that he knew it would be cold with lots of ice and he thought he would be prepared.

ACTRESS RISKED SNAKE BITE

NEW YORK, July 12.-After a week's diet of vegetables climaxed by a "spinach bath," brunette Beebe de la Fontaine held out her hand to a six-foot rattlesnake on the stage of an auditorium here last night. The snake struck, Miss de la Fontaine shrieked. Then she bundled the writhing reptile back into his green wicker basket, rubbed a lemon over her second finger and retired to await confirmation of Dr. Lloyd C. Shanks's theory that vegetarianism renders snake bites harmless.

TREATY MONEY FOR INDIANS ARRIVES

Indian treaty money party, that is engaged in making annual payments in the flood-stricken areas of the north, arrived at Fort Vermilion Thursday night from Little Red River in a Canadian Airways Ltd. plane piloted by Archie McMullen.

Says Agriculture Will Continue In The West In Spite Of Any Drouth

Agriculture can be and will be carried on successfully on the open plains of western Canada notwithstanding drouth conditions, said Hon. J. G. Taggart, minister of agriculture in Saskatchewan, in addressing a session of the convention of the Canadian Society of Technical Agriculture at Edmonton. His subject was "The Western Drouth Situation."

Grain-growing will be the type of agriculture that will be chiefly followed, in Mr. Taggart's opinion, but other types of farming will be followed as supplementary sources of revenue.

There will be a tendency, he thought, to larger farms and also toward the creation of reserves to provide against future adversity. Mr. Taggart, in dealing with the problem of the dry belt, did not regard Alberta's experience with irrigation as sufficiently satisfactory to be followed in the other provinces.

Conservation of water for crop production by dry farming methods is the most important of improving the stability and productivity of the drouth area, Mr. Taggart believed, and he added that with an average rainfall it should be possible to store from four to six inches of water in summer-fallow land.

He regarded as generally adverse to him the view that water could be provided by any feasible irrigation scheme in his province.

Crop rotations will not solve the problem of soil drifting or any other important agricultural problem in the open plains, said Mr. Taggart, and cereal production and summer-fallow in cycles of two or three years will be the best course.

Physical reserves in the form of seed and fodder should be built up, the speaker pointed out, in any dry country. Groups of farmers might combine, he suggested, to carry such reserves, even though co-operative or community enterprises may not yet be possible.

New methods of making land appraisals will be necessary in view of the present financial difficulties of prairie farmers and the debt adjustment legislation now in operation. He stated in a paper by Prof. H. C. Grant, of the University of Manitoba. In Mr. Grant's absence, the paper was read by F. W. Reloehi.

"The farm mortgage, which was once regarded as a blessing, may now be a curse to both the mortgagee and the mortgagor," thought Prof. Grant. "In the future it may be a share of the social dividend, if anyone knows what that means; but whatever happens, there must be new appraisals of land values."

Instead of farm lands being valued only on a basis of their productive capacity, as emphasized largely under the Farmers' Creditors' Arrangement Act, there must be a consideration, said Prof. Grant, of such points as normal sale value, forced sale value, and speculation, condemnation, loan, and assessed values.

Speaking of conditions in his own province, Prof. Grant pointed out that of 54,000 farms in Manitoba, 19,000 have mortgages on them, totalling \$76,000,000 and averaging \$10.88 per acre. Only one-third of the mortgages are held by loan and insurance companies, it was stated.

After the address by Mr. Taggart, plans of the Dominion government for meeting the problem of the drouth area were outlined by Dr. E. S. Archibald, director of Dominion experimental farms. Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming in eastern Canada.

Some 36,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald pointed out, and to meet the situation this created a rehabilitation programme has been drawn up under legislation passed this year at Ottawa. The programme is to run for five years, and the first year's vote is \$750,000, with an additional \$500,000 voted later for water development work.

Firemen Forgot Hose
Because firemen of Ratibon, Central Bavaria, forgot the hose when they dashed to a recent fire, the owner of the burned building threatened to sue the municipal authorities for damages. The alert fire fighters answered the alarm promptly and took the latest type of fire engine, but the lack of hose left them nothing to do but stand and watch the building burn down.

A new window-glass is being marketed which eliminates indoor shadows. This is due to the fact that the sun's rays, instead of passing through it as through ordinary glass, are distributed evenly. Further, heat and cold are excluded.

Criticism Was Unnecessary

Stratford Paper Thinks Prince Of Wales' Speech Was All Right

The world does seem to be nervous and jittery. The Prince of Wales was attending the conference of the British Legion when he made a remark about a delegation of German war veterans being welcomed in England, and also expressed the view that a British delegation should visit Germany. We believe the following is a correct version of his further remarks:

"I feel there could be no more suitable body or organization of men to stretch forth the hand of friendship to the Germans than we ex-servicemen, who fought them in the Great War and have now forgotten all about that."

If one reads that carefully it is difficult to find anything wrong with it; we cannot see where the Prince said anything which should not have been said, but right away things began to happen.

The matter came up in the British House of Commons, and the Foreign Secretary in reply said he neither approved nor disapproved of what had been said; it was an affair of the British Legion and not of the British Parliament.

The speech caused what is called uneasiness in official quarters of the French and Russian embassies in London, and it is stated it was necessary to have them notified in a nice quiet way that the Prince of Wales was not speaking on behalf of the Government, and that members of the cabinet had not been informed in advance of what he was going to say.

It is also suggested that Captain Anthony Eden, on his visit to Paris, may find it advisable to stop and make it thoroughly understood that there was no political significance in the address of the Prince of Wales. So there you have it. The address pleased the Germans a great deal. It is said they regarded it as a gesture of friendship. They liked it.

We admit frankly and bluntly that we know nothing whatever about the method or technique of international diplomacy, but with that admission we couple the belief there was nothing wrong with what the Prince of Wales had said. What would be wrong with German soldiers or ex-soldiers visiting in England, or with England soldiers or ex-soldiers visiting in Germany? Would there be some great crime committed if they were to visit and become acquainted? Must it be that their visit be kept until such time as they are ready to battle with the other? Our idea is that it might do much good for the soldiers of one country to visit in another even if the diplomats did scowl and say it should not be done. The rumour which has been raised about the remarks of the Prince of Wales looks positively childish and it reflects an atmosphere of suspicion and distrust in which there is no international good health.—Stratford Beacon-Herald.

Regaining Its Popularity
People In England Are Taking To Snuff Habit

Snuff—the "vice" of the fashionable set a century ago, supplanted by cigars, pipes, and latterly cigarettes—has regained a pinch of its one-time popularity.

Tobaccoists in Britain report that sales of snuff have gone up 1,000 per cent. in the last six or seven years. Furthermore, doctors are prescribing an occasional snuff as a cure for catarrh and headaches.

From the beginning of the century until a few years ago, the managers of a tobaccoist's firm established in the west of London for 200 years said, "we were selling only a few pounds of snuff a week to old customers who had never abandoned the habit. Now we are selling many times that amount."

"Among certain sections," he continued, "snuff has never gone really out of fashion as a stimulant. Modern men in the legal profession, who may have to sit for hours in a court without the comfort of a smoke, frequently resort to a pinch of snuff."

"If you see a learned counsel, or even a judge, making curious manoeuvres behind a large handkerchief, it is as likely as not that he is an addict. There are clerghmen, too—and maybe bishops who take snuff."

Women, too, are practicing the habit now, as did their grandmothers.

Radium Found In Russia
Radium, one of the rarest and most costly of minerals, has been found near Elendorf in the Narimanov region of Azerbaijan. Still other deposits were discovered in Kurdistan. Soviet research institutes are now studying the specimens of strata containing radium to determine the possibilities of commercial exploitation.

Marathon Bicycle Ride
A group of Russian students from the Sverlovsk Mining Institute have begun a marathon bicycle ride of 7,500 miles. The route, which lies over the steppes of Kazakhstan, the sand desert of Karakum, and the Caucasus mountains, is expected to take them from 110-115 days.

The African gray parrot uses face powder. The bird keeps it face coated with a fine, white powder, which it gets from a certain patch of feathers on its breast. The tips of the feathers break off and form a talc-like powder.

In India, white persons are expected to wear evening clothes when they go to the movies at night.

Fritflies have no particular value, but to devour snails and the larvae of insects.

Charleston, South Carolina, has kept weather records almost without interruption for 196 years.

BEWARE TROOPS

By this novel device the people of various towns and villages in the South of England are warned of the approach of troops on manoeuvres. This soldier is a member of the Queens Own Royal West Kent Regiment, and the words "Beware Troops" are made of large studded reflectors.

An Envious Record

Alberta Claims To Be Lower Than Other Western Provinces In Percentage Of Defaults

With a lower percentage of defaults in municipal debentures than various other provinces, Alberta has an enviable record in municipal finance, Hon. J. R. Love, provincial treasurer, stated in an address.

Alberta's percentage of defaults was only one-half of one per cent, compared with 19½ per cent. for Ontario, 13 per cent. in Manitoba, and 8½ per cent. in British Columbia and Saskatchewan.

Automobile accidents in the rural regions are currently increasing at a greater rate than in the urban sections.

Firemen commonly refer to a two-alarm fire as a two-bagger, a three-alarm fire as a three-bagger, etc.

The SNAPSHOT GUILD

VACATION PICTURES

Land or sea offers untold opportunities for snapshotting.

With the arrival of really warm summer weather, beautiful trees and flowers, we begin to think in earnest about outdoor life and vacations. I suppose one could go on a vacation without a camera but that would be like trying to sail a boat without a rudder. To say the least it would seem that something important was missing.

When planning a vacation you should look forward to the snapshots you are going to get for your return to home and work, and in later years when your trips become fond memories, you can always turn to your snapshots and enjoy your vacations over and over again. Snapshots pay dividends in your vacation investments in continued pleasure long after your return.

There is one important thing to keep in mind to vacation snapshotting and that is the variety of light conditions you may encounter in your travels. Picture taking might well be classed in four groups, according to the exposure they need, and by adopting as a standard exposure for each group, one that is intermediate between the shortest and longest that will make a satisfactory exposure, there will be only four exposures to consider and these can be memorized.

These four groups are as follows: Number one—Marine and beach scenes and extreme distant landscapes. Number two—Ordinary landscapes showing the sky with the principal subject of your picture in

Where Dickens Got Names

Register Of Holborn Church Furnished Many Of Them

The two names Oliver and Twist are entered close to each other in the files of the parish register of the church of St. Andrew, Holborn. James Twist, the son of a shoemaker, of Baldwin Gardens, Holborn, is recorded as having been born in 1813. Oliver is the name of a woman who was entered in the same year. The discovery is further evidence of the way in which Charles Dickens took many of the peculiar names used in his novels from the register at St. Andrew's. Mr. A. Jones, the vergor, in his normal work, has for many years been compiling a list of names found in Dickens from the files of the Parish register between the years 1785 and 1859. There are now on his list over 60 names of people who probably lived in Holborn during Dickens' stay there. Among other discoveries of the probable origin of names are Corney, Rigault, Todd, Minna, Mobbs, Wicks, Tappie, Heep, Brass, Badger and Harpmon.

Must Combat Grasshoppers

Saskatchewan Minister Of Agriculture Issues Warning To Farmers

A call to farmers to be prepared to battle with grasshoppers was issued by Hon. J. G. Taggart, Saskatchewan minister of agriculture.

"We cannot safely depend upon the most favorable conditions prevailing throughout the next two months. We must make plans to meet the situation," he said.

Mr. Taggart added: "Because of the unusually good rainfall and low temperatures which have prevailed this spring, some people believe that the hoppers will not hatch. This belief is not in harmony with experience. As a matter of fact, good moisture conditions prior to hatching helps rather than hinders the hatching of the young hoppers."

Mr. Taggart stated that all arrangements had been made for the distribution of poison bait, and he urged all farmers living in infested districts to be in readiness to combat them.

Notice in a church: "Worshippers who intend to put buttons in the collection are requested to give the money and not pull them off the hanks."

A leopard seal is the Pacific coast variety of the common or harbor seal which is more spotted than is that of the Atlantic.

Lions in captivity are said to grow better manes than those living in a wild state.

Is Possible To Banish Tuberculosis From The Face Of The Earth

Leaf Diseases Outlined

Wheat And Barley Are Subject To Great Many

The leaves of wheat and barley plants are subject to a large number of different diseases which often seriously reduce the value of the crop. The Division of Botany, Dominion Experimental Farms Branch, draws attention to these diseases, so that they may be recognized and proper control used if serious outbreaks occur.

Spot Blotch on wheat and barley is the result of an infection of the plant by a fungus. Oblong, dark brown spots, surrounded by a yellowish halo, are characteristic of the disease. The fungus may cause a root-rot or seed discoloration. The sowing of infected seed results in seedling blight. This disease is very prevalent.

Net blotch—is found chiefly on barley. The symptoms on the leaves resemble those of spot blotch, but the spots are examined closely a network of darker lines may be seen in the darkened disease areas.

Leaf Stripe is confined to barley. The disease is characterized by narrow brown streaks on the leaves. As the leaves wither, the streaking occurs. No heads, or at most, a few, are formed. This disease is different from "false stripe" in which grain-bearing heads are formed and fraying of the leaves does not occur.

As these diseases hibernate on seed, debris, or in the soil, control is difficult. Treatment of the seed with Ceresan destroys the fungus. Diseased stubble and straw should be burned. A crop rotation in which sweet clover is included is advisable. Where the crop tends to grow slowly, a light seeding is essential to prevent rapid spread of these diseases.

The Proper Answer

Messenger Boy Stood In Wet With His Chief

When James Gordon Bennett was at the head of the New York Herald he spent much of his time, in later years, abroad. On the occasion when he visited the paper news was apprised of his coming. One day when he was making one of these visits, he was passing down a corridor when a door flew violently open and a boy dashed out, nearly knocking Mr. Bennett from his feet.

"Here! Here!" expostulated Mr. Bennett. "What's all this? What's all this?"

The boy recognized the chief and very much confused stammered an apology. "I'm—I'm sorry, sir! I was going on an errand."

"Well! Well!" said Mr. Bennett. "If you are going on an errand that is the way to go, and he pressed a coin into his hand.—Christian Science Monitor.

Vegetarian Fish

Cleared Shallow Ornamental Lake In China Of Weeds

The center of the campus of Yenching University, American missionary-supported institution near Peking, China, is a shallow ornamental lake. Some time ago it was noticed that this lake was rapidly becoming choked with weeds. Ornamental qualities were greatly reduced, and freshmen raised objections to being thrown into the weeds.

Faced with the problem, the business department purchased a large number of "grass fish." These fish, true to their name, are vegetarians, spurning worms, flies and small fry when they can browse off succulent sea-weed or nibble at grass hanging in the water.

Like other grazing animals, "grass fish" have prodigious appetites and multiply rapidly. Within a surprisingly short period the lake was cleared of weeds.

St. Kilda's Jubilee Gift

It is stated that the King is to have a length of tweed woven from the wool of wild sheep as a jubilee gift from St. Kilda, the evacuated island off the West Coast of Scotland. The Earl of Dunfermline, eldest son of the Marquis of Bute, who bought St. Kilda as a bird sanctuary some three or four years ago, is to make the presentation.

Servants On Approval

An "on approval" idea for servants is proposed by a woman's organization in Saxony. Under this plan girls who have just left school will be placed "free of charge" in families where a servant is kept, for a six days' mutual trial. At the end of this period the parties may agree to separate—or spend a further year together.

Medically speaking, it is possible to banish tuberculosis from the face of the earth. Dr. H. E. Kleinschmidt, secretary of health education, National Tuberculosis Association, New York, said in an interview.

"When we say 'abolish,' we do so from the standpoint of control. Plague is not gone, but neither does it ravage the world as it once did, because it is controlled," he stated.

Destroying the old theory that T.B. germs are present in every one, merely awaiting a lowered resistance to take active effect, Dr. Kleinschmidt stated that fully 50 per cent. of the youth of colleges and municipalities, particularly in urban municipalities, were infected with early stages of the disease.

"On the other hand," he pointed out, "we have isolated communities where virtually all the children are free of it."

This knowledge is what demands of medicine that with the help of the public it drop its defensive wall and go out in search of the disease.

To the present our fight with tuberculosis has been defensive, the isolation of definite cases of the disease, mainly in sanatoria. In the last twenty-five years the death rate has fallen to about one-third and it has dropped from the chief cause of death down to sixth place.

These facts are leading many people to think that it is no longer a menace. They are dropping their guard," he said.

The only way to go out and fight the disease is to make an examination of all children with the tuberculin test and the X-ray. The test is a very simple, harmless and cheap and merely determines whether or not the germs are present, he said. The X-ray is relied upon to disclose whether any harm has been done.

"By this means we hope to anticipate the disease and not wait for it to develop. It is not a matter of expense so much as it is one of organization and public vigilance."

"There is no telling where the germs are," he continued in paying tribute to the X-ray, which had almost replaced the aethoscope and "symptoms," in the diagnosis of tuberculosis. "We used to think that undernourished children were the most susceptible to it. They are just as likely to find it in the healthy, well-nourished child."

"Tuberculosis is a germ infection. Not a single germ, but a definite massive infection. They refer to it as a family disease. It runs through families, not that it is hereditary, but solely as an infection."

"A mother, unconscious of having tuberculosis, kisses her infant child on the mouth; that child has the disease," Dr. Kleinschmidt stated, and placed overwork, lowered resistance, and such generally bad conditions as being merely contributory elements once the germs had entered the body.

Speaking briefly of treatment, he emphasized the practice of lung collapsing as "the brightest ray that ever entered the life of a consumptive."

A relatively new method that has been in use upward to ten years, although it was known before that, it merely entails collapsing the lung or an affected part to allow the lung an opportunity to rest. A more radical treatment is to remove sections of the ribs so that the chest caves in and the lung is collapsed. This is a permanent collapsing, and Dr. Kleinschmidt emphasized one fact: "It is not a cure-all. There are cases to which it is not applicable."

Books Play Important Part

Have Great Influence On Lives Of Those Who Read

Books may play two different parts in the lives of men. They may be a respite and an escape from life. They may build for us the walls of another and quite separate world in which we can take refuge from all that wounds and limits and frustrates us in this one. Or they may be the daily bread of our thought and action, an element necessary to the practical working of our lives here and now.

—an which ever part they play whether they are to us the quiet garden in which the spirit dwells apart, or the fuel which feeds the active, militant mind and arms it for its encounter with hard facts, they become—whether we know it or not—an integral part of the texture of our being.

World's Champion Typist

A new champion, Albert Tangora, 32, of New York, today bore the title "world's champion typist." Tangora hit 40,585 strokes on a specially constructed machine in one hour to win the title in the International Commercial schools open typing contest. He averaged 128 words a minute to take the title from George Hoesfield, also of New York.

Net debt of the world to the United States is \$20,645,000,000.

LAST TRIBUTE PAID TO T. PARCELLS

RED DEER, July 20—Last respects were paid Friday afternoon, to one of the oldest pioneers of the Hornhill district, T. P. Parcells, who died last week at South Sunas, B.C., where he had been living during the past few years. The service was held in the Hornhill church and Rev. Kettle, present pastor of Willowdale district, officiated. Orme's funeral home was in charge. Beautiful floral tributes adorned the bier, and interment took place in the Hornhill cemetery.

The deceased was born in Essex county, Ontario, in 1862. He married Miss Hannah Vincent of Kingston, Ontario, in 1884, and seven years later emigrated to the west with his small family and home-stayed in the Hornhill district in 1894, being one of the earliest settlers in the Red Deer district. They farmed in that district till 1926.

The deceased was an active U.F.A. worker and took keen interest in public affairs. He was councillor for many years of the municipal district of Arthur where he gave valued service to his community.

Besides his widow, Mr. Parcells leaves four daughters: Mrs. J. A. Code, Camrose; Mrs. Goddall, Chauvin; Mrs. J. A. Place, Portland, Ire.; Mrs. R. A. McAllister, Penhold; and seven sons: Will, Chauvin; Melford, Lacombe; Roy, MacLeod; Ivan and Timothy Jr., Hornhill; and Hugh and Maurice, Hildred.

A NATIONAL MOVEMENT

If anyone had been unaware of the existence of a condition of nation-wide and acute unrest in Canada, the front page of a newspaper would inform him of the fact any day now. In any edition of any paper that prints the news, one or more headlines tell about unemployed men somewhere marching toward Ottawa, or threatening to, or being hailed into court to explain why they tried to do it.

There never was a time when so many people seemed to want to get to Ottawa, unless it was just after the election of 1930 when the "faithful" were flocking there to get their hand-outs and the fearful were going along to see if they were to be left out of the distribution.

What the marchers hope to gain to getting to Ottawa nobody, but themselves seems to know, and they do not explain in any way that clears up the mystery. They have been told definitely they won't get the work and wages, which they want. But still they tramp the highways, foot-sore and hungry, until the police stop them and send them back to court.

It is a remarkable phenomenon, one to which Canada is altogether unused; and chatter about Commun-

ists inspiring the marchers to try to overthrow the Government does not impress anybody. Probably the driving force behind the movement is sheer weariness with having nothing to hope for; a state of mind in which the desire to move is irresistible, however illogical and even absurd.

WRIT ISSUED FOR

ELECTION AUGUST 22
Formal issuance of the necessary writ calling the provincial general election was made on Monday morning by ministers of the Alberta government and John D. Hunt, chief electoral officer, is therefore empowered with the arrangements for the balloting.
